Professional Summary

A Full Stack Engineer with strong skills in building and growing web and mobile applications using JavaScript, Node.js, React.js, React Native and PostgreSQL. I have hands-on experience in creating APIs, integrating other software, and making applications faster and more secure. I enjoy working in collaborative, fast-paced teams and look forward to contributing my skills to innovative projects.

Experience

PALAT Technologies FPL India Pvt. Ltd. (Restolabs)

Software Developer

Jan 2024 – Present

Noida, Uttar Pradesh

- Product Transformation Leadership:** Spearheaded backend and frontend feature development for the successful transformation of Restolabs' flagship product from version 2 to version 3.
- API Development:** Architected and deployed over 30 APIs with Node.js, enhancing application capabilities and user experience by slashing response times and accelerating data retrieval.
- Real-time Driver Tracking:** Crafted a real-time driver tracking system using React Native and Node.js, resulting in a 30% boost in route efficiency, 25% faster deliveries, and a 20% rise in customer satisfaction.
- Payment Gateway Integration:** Implemented the RevitPay gateway, enabling secure payment processing for over 500 orders daily and boosting transaction reliability.
- Security Enhancements:** Deployed an automatic bot detection system to monitor and block suspicious activities, successfully reducing system vulnerabilities by 30%.
- Bug Resolution Expertise:** Resolved more than 40 critical bugs, significantly strengthening application stability and performance.

Winfinity Solutions

Software Developer Engineer - Internship

Jun 2022 – Nov 2022

New Delhi, India

- Front-End Development:** Constructed reusable, modular UI components that increased code maintainability by 30% and improved front-end performance by 20%.
- API Development and Integration:** Produced 10+ REST APIs and unified multiple third-party services, expanding product functionality and reducing integration issues by 25%.

Projects

Email Marketing Platform | NestJS, PostgreSQL, Angular

Sep 2025 – Present

- Campaign Management:** Building a full-stack email marketing platform capable of sending 10,000+ bulk emails per campaign, with scheduling, segmentation, and automated delivery workflows.
- Performance Analytics:** Adding a tracking pixels to measure email open and click-through rates, and building an Angular-based analytics dashboard to provide actionable insights once deployed.
- Scalable Email Delivery:** Architecting a robust NestJS backend capable of processing 10,000+ emails per campaign with high throughput and 99.9% delivery reliability.

Odravel (Restolabs) | React.js, React Native, Node.js, MySQL

Jan 2024 – Mar 2024

- Efficient Delivery Tracking Solution:** Worked on a React Native app that provided real-time visibility for 100+ delivery agents, reducing delays by 20%.
- Admin Interface:** Designed a React.js-driven admin panel that increased administrative efficiency by 35% by simplifying fleet oversight and accelerating order assignment workflows.
- Optimized Delivery:** Executed a structured evaluation of the delivery pipeline, cutting operational overhead by 15% and raising customer satisfaction scores by 18%.

Technical Skills

Programming	JavaScript, Python, C/C++, Java (Basic), CSS/SCSS, HTML
Frameworks	React.js, React Native, Node.js, NestJS, Django, Express.js, Django Rest Framework
Databases	MySQL, PostgreSQL, MongoDB
Tools	Git, Github, Redux, Material UI, Bootstrap
Others	Firebase, Object-Oriented Programming (OOPs), REST APIs, Agile Methodologies

Education

Bachelor of Technology in Computer Science & Engineering

Dr. A. P. J. Abdul Kalam Technical University, Lucknow, Uttar Pradesh

(CGPA: 8.33)

Graduation - Jun 2024

Achievements & Certifications

- Winner, Smart India Hackathon (SIH) 2023
- Solved 400+ LeetCode problems
- React Based UI Development - TCS AsCEnD
